

INTRODUCCIÓN:

- 1. Estos diagramas han sido el resultado de años de trabajo, utilizando los siguientes libros:
- -"Lectures on Tung's Acupuncture. Points Study", Dr. Wei Chieh Young
- -"Practical Atlas of Tung's Acupuncture", Henry McCann
- -"Master Tong's Acupuncture", Miriam Lee
- -"Advanced Tung Style Acupuncture: Dao Ma technique", James H. Maher
- -"Advanced Tung Style Acupuncture: 6A Intern Medicine", James H. Maher
- -"Advanced Tung Style Acupuncture: 6B Intern Medicine", James H. Maher
- -"Advanced Tung Style Acupuncture: 7 "Ophthalmology, Otor-hinolaryngology", James H. Maher
- -"Advanced Tung Style Acupuncture: "Obstetrics & Gynecology", James H. Maher

Al principio fueron esquemas para mi mismo, poco a poco añadiendo cosas y haciéndolos más completos, luego se me ocurrió el porque no compartirlos ya que eran muy útiles para mi, asi las cosas se fueron complicando y acabé con estos esquemas que no se si llamar libro.

En el futuro este compendio tendrá gradualmente el resto de los libros de Maher, "One needle Therapy" del dr. Young y más información. Esta es la versión 1.0 probablemente en algunos meses vendrá la siguiente.

Animo a comprar los libros descritos, estos esquemas son sólo una parte de la interesante información que se encuentra en

ellos.

- 2. La idea ha sido que todos los practicantes de la acupuntura Tung puedan tener diagramas que fueran completos y accesibles. Hemos creado el PDF interactivo, y una aplicación para que sea más fácil de usar estos diagramas.
- 3. La idea de coherencia del Dr. Lipton creo que es algo que hay que poner en práctica. Si todos cooperamos juntos, sin restricciones, el resultado beneficiará a todos, primero individualmente y luego colectivamente. Creo que la acupuntura aún tiene un largo camino por recorrer. Cooperemos para que ese camino sea amplio y fácil de caminar.

Tengo una petición a los colegas que quieren utilizar la aplicación, les ruego que tengan al menos un paciente gratuito en su clínica, siempre. Con el tiempo verán la conveniencia de esta visión.

- 4. Hay un vídeo explicando su uso, y las bases en You Tube: https://youtu.be/yWGUJEpSBUE
- 5.- Normalmente después de los puntos recomendados de una patología, están las recomendaciones hechas por los autores citados.

Después de cada punto, esta el meridiano al que pertenece, ej: 22.05 LI (Intestino Grueso), usaremos este punto, si hay un meridiano alterado en el paciente sobre el cual pueda trabajar el IG(LI). Esto nos ayudará a escoger más eficientemente el punto a trabajar y conseguir mejores resultados. Además de las recomendaciones de autores, se puede, sobretodo en el caso que las recomendaciones no tengan el efecto que deseamos, crear nuestras propias recetas de puntos basándonos en

los meridianos afectados.

6.- La información se presenta únicamente con fines educativos, informativos y de investigación. Las técnicas y prácticas deben utilizarse de acuerdo con la discreción y responsabilidad del profesional. Los proveedores de atención médica deben ejercer su propio juicio clínico independiente al usar la aplicación. Si usted no es un profesional, primero debe ponerse en contacto con su médico, no debe seguir las recomendaciones sin la formación adecuada en esta técnica. El autor no es responsable de ninguna manera por cualquier lesión física, u otras consecuencias que pudieran ocurrir siguiendo las instrucciones de los diagramas o la aplicación.

7. – Si alguien encuentra un error, por favor envíeme un correo electrónico explicando el motivo de ese error y trataré de corregirlo.

Espero que el trabajo hecho sea de utilidad. Un abrazo para todos.

Dr. Fernando Iturralde

Valencia, 30 de diciembre de 2019
